EDUCATION

University of California, Los Angeles (UCLA)

B.S. Electrical Engineering

Los Angeles, CA

Expected June 2027

- **Relevant Coursework:** Algorithms and Complexity, Data Science, Applied Numerical Computing, Linear Algebra, Computer Organization, Computer Vision

EXPERIENCE

Software Engineering Intern

Hanwha Life Insurance Co.

Jun. 2026 – Aug. 2026

Seoul, South Korea

- Implemented a **Java** gift-tax calculation kernel covering lump-sum and recurring gifts, **10-year** deduction windows, and age-based exemptions; validated **25** domain cases.
- Built **Swift** calendar, simulator, and home-widget flows in the PLUS Pi iOS app, connecting backend events to **90-day** filing reminders.
- Reduced out-of-window calendar requests **81-fold** through prefetch gates and assistant roster lookups from **3 to at most 1** per interaction.

Staff Software Engineer

Daily Bruin

Sep. 2025 – Present

Los Angeles, CA

- Maintained **Django REST APIs** and data services for a publication serving **60K+ weekly users**, using SQL and MongoDB.
- Containerized backend services with **Docker** and deployed them on **Kubernetes** for repeatable releases and recovery.
- Built CI/CD workflows for internal tools and debugged issues across application, database, and deployment layers.

Founder / CTO

Hoopsterz Corp.

May 2023 – Dec. 2023

Seoul, South Korea

- Founded a pickup basketball platform on the **MERN stack**, deploying the app to Vercel with assets on AWS S3.
- Moved offline bookings online, increasing user engagement **75%** according to company tracking.
- Increased organic traffic **20%** through SEO and targeted acquisition campaigns.

PROJECTS

Quant Trading Platform | *Python, AWS EC2, Redis, MySQL*

Aug. 2026 – Present

- Built a **24/7** paper-trading platform for Korean and US equities with WebSocket/REST market adapters and risk controls.
- Enforced **4** architecture layers with import-graph tests so data collection and LLM reporting cannot call execution code.
- Added **7,000+** regression tests and **1-minute**-bar trade replay to inspect exits, cost assumptions, and failures.

RIFT.GG | *Next.js, TypeScript, PostgreSQL, Gemini*

Jun. 2026 – Present

- Built search, live rank, and match-history features across **11** League of Legends regions using Riot APIs.
- Implemented PostgreSQL caching with stale-while-revalidate and an **hourly** background tier-list crawl.
- Added streaming Gemini match analysis and **10-player** live scouting with a **10-request / 5-hour** AI limit per IP.

What's My ATS? | *Next.js, TypeScript, FastAPI, SQLAlchemy, Gemini*

Oct. 2025 – Jan. 2026

- Built a Vercel-hosted **Next.js 16** frontend and **FastAPI** backend to compare resumes with target job descriptions.
- Implemented a **0–100** keyword-coverage score and surfaced up to **8** missing terms for focused revisions.
- Integrated Gemini feedback and persisted **3** record types—resumes, job targets, and analyses—through SQLAlchemy APIs.

TECHNICAL SKILLS

Languages: Python, Java, C/C++, TypeScript, JavaScript, Swift, SQL, Bash

Frameworks: Django, Spring Boot, React, Next.js, Node.js, FastAPI, REST APIs

Infrastructure & Data: Docker, Kubernetes, AWS EC2/S3, Git, CI/CD, Linux, PostgreSQL, MySQL, MongoDB, Redis
